

Evacuation Slide Task Card

Maintenance task card | Final specimen

<https://www.editfast.com/editing-services/aerospace-defence-and-space/aircraft-maintenance/>

A task card in which one part carries two names, a reference gives a number instead of a procedure, and the header and footer disagree.

FINAL TEXT

SPECIMEN, PREPARED BY EDITFAST FOR ILLUSTRATION. NOT A REAL RECORD.

TASK CARD TC-25-62-04 Rev. 3

Kestrel 420 (fictitious type) - Evacuation Slide, Girt Bar Installation

Meridian Air Services (fictitious)

Note: the manufacturer's manual uses two names for this part. This card uses inflation cable throughout.

1. Install the slide pack in the door sill.
2. Route the inflation cable through the tab grommet.
3. Connect the inflation cable to the retaining ring.
4. Verify the routing in accordance with AMM 25-62-04, Evacuation Slide Installation, paragraph 3.B.
5. Check that the inflation cable is secure.
6. Sign and date this card when steps 1 through 5 have been performed.

Form TC-25-62-04 Rev. [query to client: the header reads Rev. 3 and the footer reads Rev. 2]
