DRAFT FDA PRODUCT LISTING (extract)

Product name: Midnight Restore Night Balm

Ingredients: Shea Butter, Caprylic Triglyceride, Squalane, Tocopherol, Fragrance.

[Query to the company: CR-4 records the fragrance as a blend of eleven materials, and CR-6 records that no decision has been taken on how to enter it. Section 364c(c)(4)(A)(iv) names fragrances expressly and then points to 21 CFR 701.3 for how each ingredient is named, which is the section allowing fragrance to be listed as fragrance. The listing now carries the word the panel carries, and the question of whether the blend is itemized is left with the company.]
