A case narrative rewritten from the order information arrived into the order the patient experienced.

FINAL TEXT

SPECIMEN, PREPARED BY EDITFAST FOR ILLUSTRATION. NOT A REAL RECORD.

CASE NARRATIVE - Calder Therapeutics (fictitious) - Product: sertivane tablets

Patient identifier CT-2026-0417 appears on the pharmacy fax dated March 14, 2026, which is the source document for this case.

The patient is a 62-year-old woman with a history of hypertension. She was taking amlodipine as a concomitant medication. She began sertivane tablets, 10 mg twice daily, on March 2, 2026.

On March 12, 2026 she was admitted to the hospital reporting shortness of breath and chest pain. She was discharged on March 15, 2026.

A pharmacist reported the case to Calder Therapeutics on March 14, 2026. In a follow-up contact on March 20, 2026 the pharmacist supplied the patient's age and sex and the admission and discharge dates. In a second follow-up on April 2, 2026 the pharmacist reported that the patient had recovered with no sequelae.
